

Bill Trussell

Mr. Bill Trussell is a senior executive and Engineer with extensive knowledge and several decades of experience in Avionics and Air-to-Ground Communications systems for both Government and Industry.

He has held increasingly responsible positions in large scale IT infrastructure operations and assisted customers with initial design and systems testing and has supported optimization for performance and cost of operations.

Mr. Trussell has also managed Large Enterprise Cyber Security Operations and has applied Cyber Security And IT Infrastructure expertise to determine technology trends for IT Market Research, Informing Customers, Systems and Software Providers and Investment Professionals.

Recently, he supported the FAA in developing a cyber security assessment methodology for airborne systems. The resulting methodology was also delivered to the aviation safety professionals responsible for certification of airborne systems.

Mr. Trussell holds a Bachelor's degree in aviation technology from Purdue University and is an active pilot and flight instructor.
