

Abigail Burke
President
Aeronautical Instrument and Radio Company (AirCo)

Abigail Burke is the President of Aeronautical Instrument and Radio Company (AirCo) located in Lodi, New Jersey. Abigail started her career with the company in 1985 as an electrical engineer working on the designs of aviation test equipment. She eventually moved into manufacturing, military sales, operations, and was appointed President of the company by the Board of Directors in 2010. Under her leadership, Abigail has expanded the engineering capabilities as well as the company's relationship with external manufacturing facilities and partners to optimize company costs and efficiencies. In addition, Abigail is committed to empowering and promoting women in leadership roles as is evident in appointing a woman to be her second in command as the General Manager of AirCo since she took the position as company President. In addition, she is actively involved in coaching high school women in tennis to develop their confidence through sports participation. Abigail is also a graduate of Villanova University with a Bachelor of Science degree in the field of Electrical Engineering.
