

Brad Mead
Chief Operating Officer
NDI Engineering Company

Mr. Mead graduated in May 1987 from SUNY Maritime College with a Bachelor of Engineering in Naval Architecture, a U.S.C.G. Third Mate License, and an active-duty commission in the U.S. Navy. Mr. Mead was assigned to the USS Butte (AE-27) stationed at NWS Earle, NJ. He served onboard USS Butte in the engine and deck departments until May 1991.

In 1991 Mr. Mead joined a maritime consulting firm in New Jersey specializing in contract management and litigation support related to shipbuilding, repair, and conversion contracts for a variety of vessels.

Mr. Mead earned a Master of Business Administration in Finance from Fairleigh Dickinson University in 2002.

Mr. Mead joined NDI Engineering Company in 2004 working on NAVAIR Aircraft Launch and Recovery Equipment, Aircraft Platform Interface, and Support Equipment programs. In 2006, he took over complete Program Management for Lakehurst services where his responsibilities included planning, organizing, directing, and controlling various technical/engineering projects and personnel. In 2016, he was promoted to Vice President overseeing the Lakehurst services work and in addition gained oversight of ALRE equipment fabrication, refurbishments, and repairs. In 2021, Mr. Mead was appointed Chief Operating Officer of NDI Engineering Company.
